PROJECTS

Face Detector App   **September, 2020 - September, 2020**

I created a face detection app using clarifai API. Stack - React JS, Node js + Express js and PostgresSql. I improved the performance by turning it to a progressive web app and adding some code splitting with react lazy. The app is also using bcrypt for secure validation from the backend incase of third party onlookers

Music Player clone   **October, 2020 - October, 2020**

I created a Music player using Apple music UI. created a toggle theme for both light and dark mode. This project is to test by css skills and vanilla JavaScript skills.
